

UPDATED JANUARY 2008 (Aug. 2010 for APA address only)
GreekKeys Keyboards/Inputs License

This license applies both to GreekKeys Mac keyboards in the .rsrc format and to GreekKeys Mac Unicode inputs in the XML format with suffix .keylayout and to these same files when embedded in the collections GKUall.bundle, GKUdcmp1.bundle, GKUdcmp2.bundle, and GKTraditional.bundle, and to Windows GreekKeys Unicode keyboards introduced in 2008.

NOTE: In the following, the numbers expressing limits refer to the permitted number of separate computers or CPUs and not to the number of instances of the software. For instance, a single Mac Intel computer with three partitions or volumes could have two instances of the Mac software installed on two separate Mac OS volumes and one instance of the Windows software installed on a Windows volume and still count as one computer for the purposes of these licenses.
